Frequent power outages can be difficult and risky

Frequent power outages not only cause damage to the appliances and electrical devices at home, but at times turn out to be dangerous and fatal.

Today, most of the residential and commercial complexes are looking for an efficient backup plan for their power requirements. For uninterrupted power supply, Honeywell now offers Automatic Source Change Over with Current Limiter (ACCL). This fully automatic EB-DG changeover automatically switches the load to Generator supply during the failure of EB supply. It also automatically switches back to EB supply from Generator supply on resumption of power.

Cable Management System

Cable Management System ensures ease of installation, customisation, flexibility, efficiency and safety; all, fundamental to the distribution of power, data and telecom cables. The Cable Management System addresses these needs effectively and provides comprehensive solutions for both Wall and Floor applications. Cable Management enables installations to be planned to suit specific layout requirements.

TECHNICAL SPECIFICATIONS

Standard Conformity	IEC 60947-6-1
No. of Poles	1P+N
Rated current	30A on mains, 1.5-10A on generator
Rated voltage	240V
Rated frequency	50Hz
Transfer time	Supply to DG - 15 seconds, DG to mains - 85 milliseconds
Ambient Temp	-5 to +55°C
Electrical Life	6000 operations
Protection Class	IP20
Mounting Position	Vertical
RoHS Compliance of Range	Compliant
